STOCK CODE: M642 A

The "Killarney Box" Public Lighting (PL) interface box.

When separating Public Lighting (PL) Equipment from ESB's electricity networks, there must now be an 'interface unit' for all public lights mounted on ESB Overhead Networks or directly supplied from ESB Overhead Networks in accordance with Electro Technical Council of Ireland (ETCI) wiring regulations.

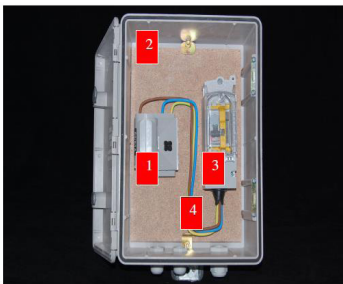

The ESB requirements takes into account the time to retrofit 'interface units' on existing public lights and enable Local Authorities or their agents to carry out work using the "Killarney Box", Public Lighting (PL) interface box.

Key features include:

- **Approved by ESB networks.**
- Meets National Code of Practice at Customer Interface, 4th edition 2008.
- Pre-wired electricity boxes.
- Robust and weatherproof with IP65 rating.
- Fire retardant: BS 476-7:1997, Class 2.
- Will not corrode, weather resistant.
- Non-corrodible hinges [not plastic] and screws.

Meets ESB Equipment Specification:

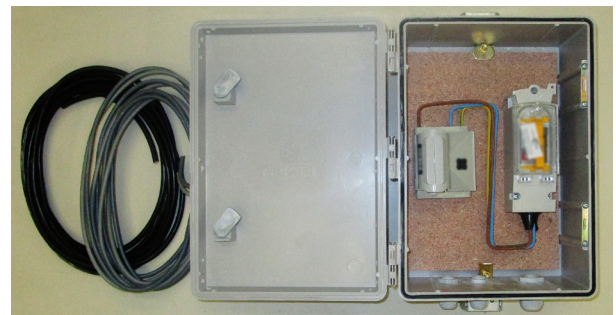

ESB equipment:
(1) Main fuse unit.

Customer equipment:
(2) Enclosure.
(3) Public lighting main switch-fuse.
(4) Internal wiring.

(Ref: ESB Public lighting information bulletin No 2.)

LVU Renewal Programme

*Tricel / Killarney Plastics Ltd. currently supply ESB Networks, to facilitate **LVU Renewal Programme** requirements, with PL Interface Units, pre-wired with internal equipment per layout as shown below. For more information, please refer to ESB Public lighting information bulletin No 2.*
